

**ERRATA CORRIGE FOR EXISTENCE AND NON-EXISTENCE
FOR A MEAN CURVATURE EQUATION IN HYPERBOLIC
SPACE: CCPA, 4, N.3, 549-568, 2005**

ELIAS M. GUIO AND RICARDO SA EARP

The assumptions are missing in the Statements: Theorem 3.1 and Theorem 3.2 (cf. p. 552, lines 3-6). In the Statement of height estimates (Theorem 3.1 and Theorem 3.2), the assumptions on the prescribed mean curvature $H(x)$ are: $|H(x)| \leq 1$ or $|H(x)| = a$ (constant). In the Statement of the main existence result (Theorem 3.3) the assumptions on the prescribed mean curvature $H(x)$ are the same: $|H(x)| \leq 1$ or $|H(x)| = a$ (constant).
